Problem

Critical pain points hindering Africa's digital commerce growth:

- Trust Deficit: 60% of online shoppers abandon carts due to safety and payment concerns, costing marketplaces billions in lost GMV.
- Revenue Leakage: Sellers lose up to 30% in potential sales due to stockouts and overselling, driven by lack of real-time inventory control.
- User Friction: Slow load times and poor mobile UI drive away 40% of smartphone shoppers within seconds, stunting market growth.
- Operational Inefficiencies: High logistics costs and fragmented courier networks add 15–20% to product prices, reducing competitiveness.

Solution

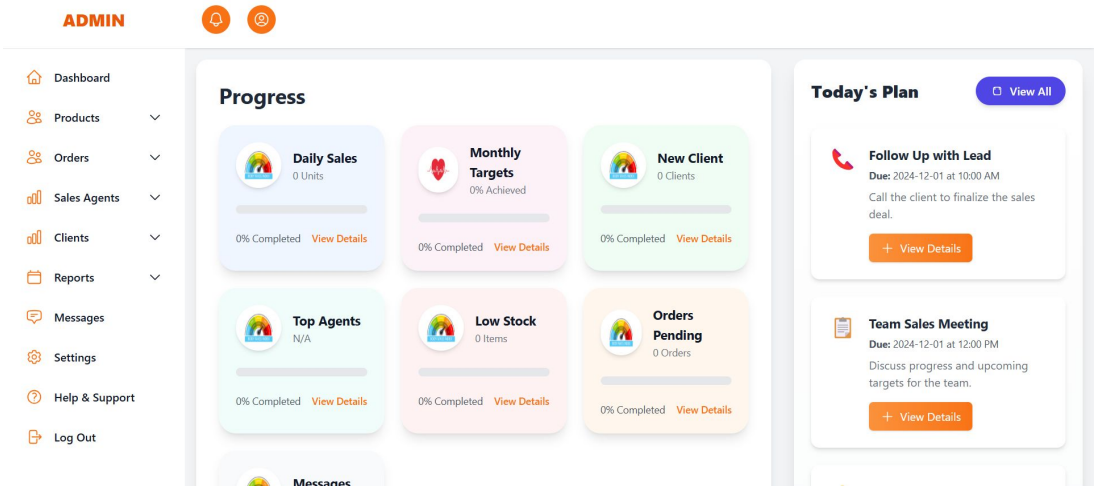

How Ghuba tackles these challenges:

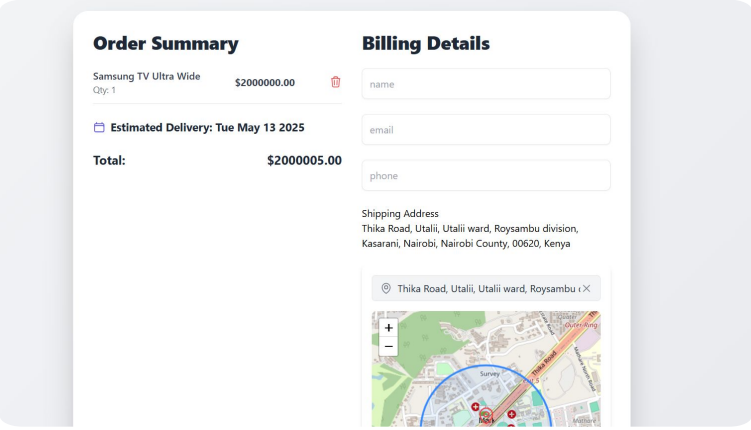

- **Built-In Trust Mechanisms:** Escrow payments and verified buyer-seller ratings reduce fraud by 70% and boost conversion rates.
- **Real-Time Seller Tools:** Live inventory sync, dynamic pricing alerts, and sales dashboards recover up to 30% in lost revenue.
- **High-Performance Mobile UX:** Lightweight, progressive web app loads in under 2 seconds on 3G, retaining 90% of mobile visitors.
- **Seamless Payments & Logistics:** One-click checkout via top gateways plus integrated courier APIs for 24/7 tracking.
- **Actionable Analytics & Insights:** AI-driven recommendations help sellers optimize listings, pricing, and promotions, driving 25% higher average order values.

Market Opportunity

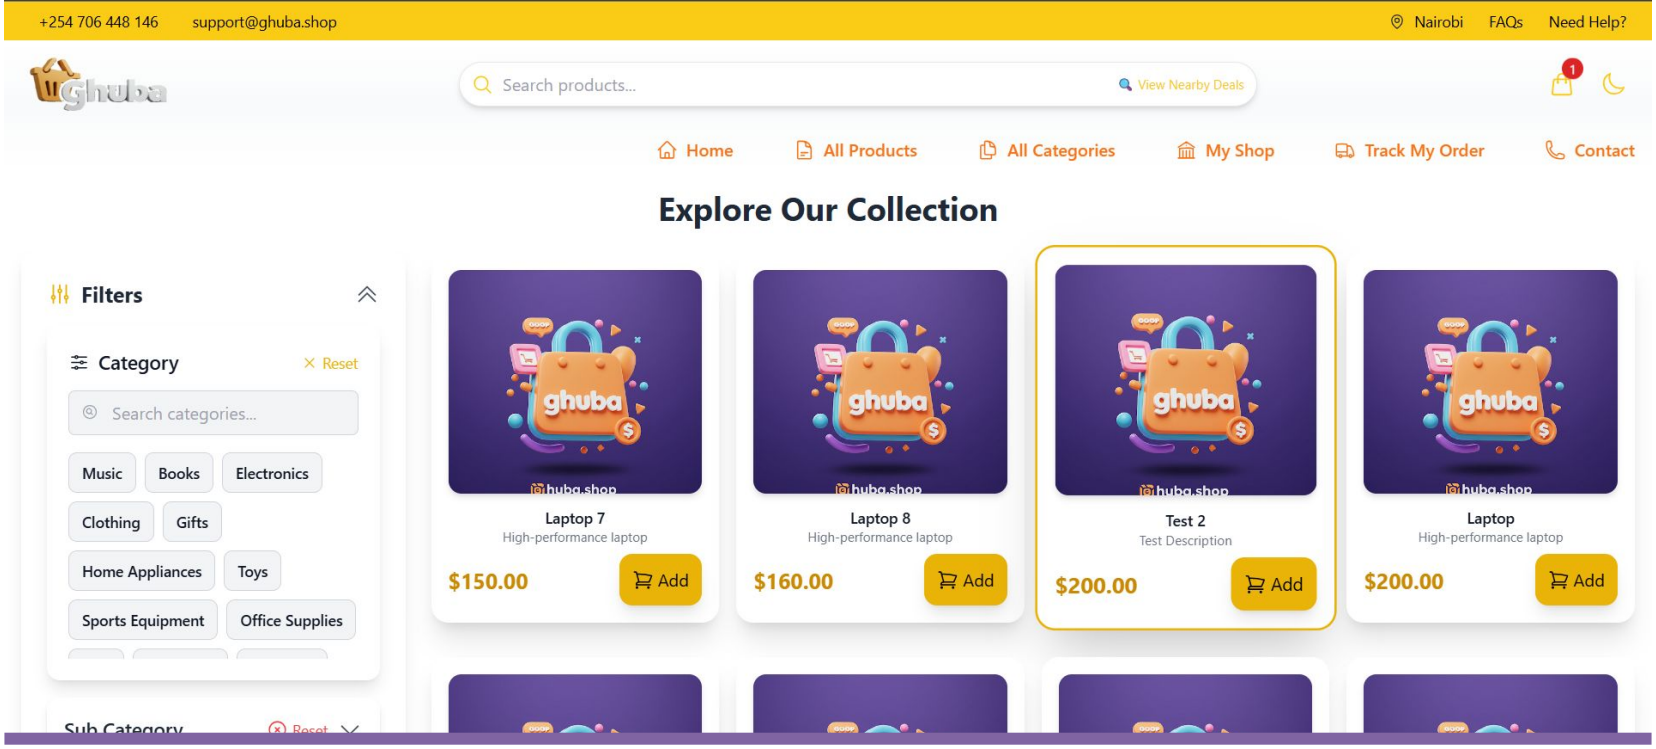

- **Kenya's booming e-commerce potential:**
- **Internet & Mobile Reach:** 28M internet users (55% of population) and 65% smartphone penetration in 2024, up from 48% in 2021.
- **Mobile Money Dominance:** 90%+ of transactions via M-Pesa, supporting seamless digital payments.
- **Market Size & Growth:** Kenyan e-commerce GMV hit $1.2B in 2024, projected to $3B+ by 2030 (CAGR ~15%).
- **Urban & Peri-Urban Demand:** Nairobi and Mombasa online retail grew 40% YoY, with rising adoption in Kisumu and Nakuru.
