Problem

Demand is Real, but Infrastructure is Broken.
Africa doesn’t have a customer problem; it has a **structural conversion problem.**

- **The Trust Gap:** High abandonment rates because payment and order visibility aren't guaranteed.
- **Revenue Leakage:** Disconnected inventory leads to overselling and missed monetization.
- **Mobile Friction:** Existing tools are "Western-first"—too heavy for low-bandwidth, mobile-centric users.
- **Operational Chaos:** Fragmented tools (WhatsApp + Manual Sheets) make scaling impossible.

Solution

The Unified Sales OS for Africa's Digital Commerce

Salesman Pro replaces fragmented, manual workarounds with a single integrated infrastructure designed to capture every dollar of demand.

1. The Trust Engine

- **Feature:** Verified storefronts with real-time order tracking and secure checkouts.
- **Outcome:** Turns "browsers" into "buyers" by removing the safety friction that kills African GMV.

2. Intelligence-Led Inventory

- **Feature:** Centralized, multi-channel inventory sync and real-time stock alerts.
- **Outcome:** Plugs revenue leakage by ensuring every click finds a product that is actually in stock.

3. High-Performance, Low-Bandwidth UX

- **Feature:** Mobile-first, lightweight storefront architecture optimized for local connectivity.
- **Outcome:** Slashes bounce rates and lowers CAC by meeting users where they are: on their phones.

4. Unified Operational Control

- **Feature:** One dashboard for orders, staff, logistics, and analytics.
- **Outcome:** Replaces "operational chaos" with "operational leverage"—costs go down as you scale.

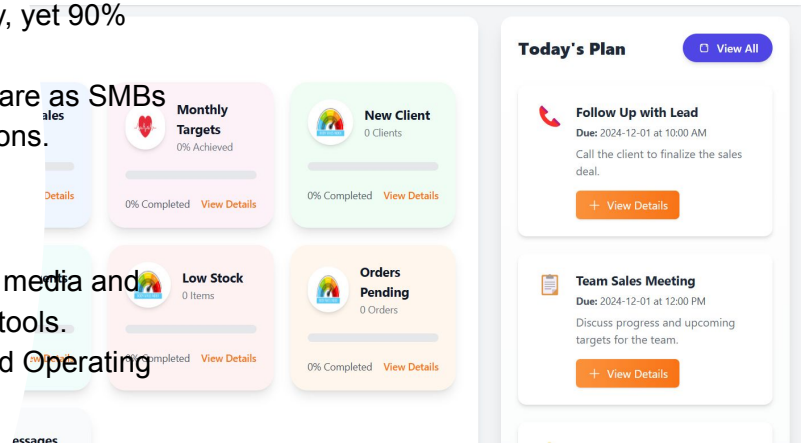

Market Opportunity

Capturing the $300B Digital Commerce Inflection

The African market has shifted: It's no longer about *getting* people online—it's about providing the **infrastructure** for the millions who are already there.

1. Total Addressable Market (TAM)

- **The $300B Prize:** Africa's digital commerce GMV is projected to reach **$302.4B by 2030** (14.3% CAGR).
- **The SMB Engine: 44M+ MSMEs** form the backbone of the economy, yet 90% still operate on fragmented, manual systems.
- **The SaaS Opportunity:** A **$20B+ annual market** for business software as SMBs transition from informal WhatsApp selling to professionalized operations.

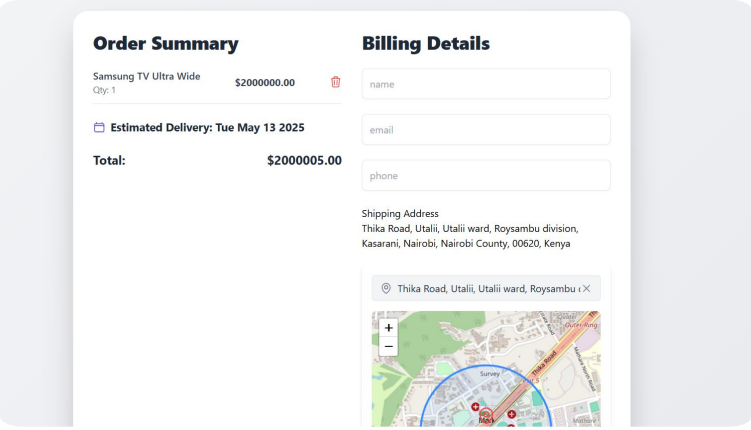

2. Serviceable Available Market (SAM)

- **15M "Digitally Active" SMBs:** Businesses already selling via social media and marketplaces but "leaking" 15–20% of revenue due to disconnected tools.
- **The Integration Gap:** A **$3B reachable ARR** opportunity for a unified Operating System that consolidates sales, inventory, and payments.

3. Serviceable Obtainable Market (SOM)

- **Target:** High-velocity urban merchants in **Nigeria, Kenya, and South Africa** (the continent's e-commerce leaders).
- **Focus:** Capturing the top 1% of high-growth sellers processing >50 orders/week.
- **Goal: $50M ARR (Years 1–3)** by replacing the "Fragmentation Tax" with one subscription.

Product Overview

Online Stores & Marketplace Selling

- Launch branded storefronts or service pages in minutes
- Sell on a shared marketplace or multiple channels

Order & Inventory Management

- Real-time inventory syncing across all channels
- Prevent stockouts and overselling
- Centralized order tracking

Sales Team & Staff Management

- Assign tasks, track performance, and manage accountability
- Monitor teams and operations from one dashboard

Analytics & Insights

- Real-time dashboards for revenue, inventory, and customer behavior
- Data-driven decisions without manual tracking

Business Model

- **Revenue Streams:**

Tiered SaaS Subscriptions

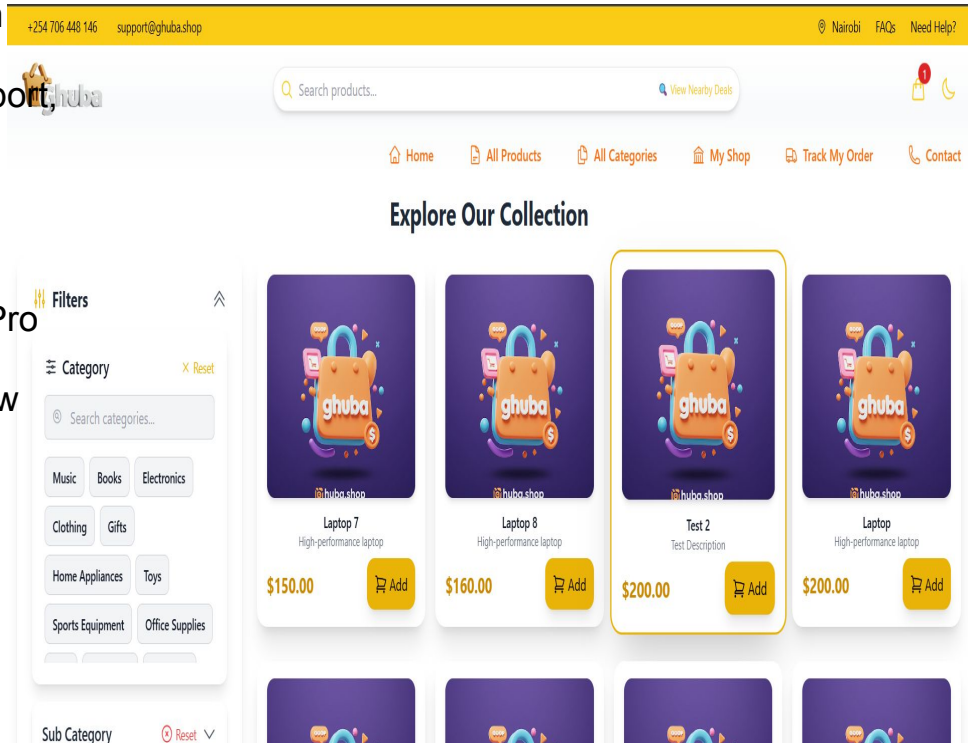

- **Basic:** Entry-level features for startups
- **Pro:** Advanced analytics, multi-channel sales, team management
- **Enterprise:** Full-featured platform with priority support, branding, and integrations
- Recurring revenue drives **predictable cash flow**

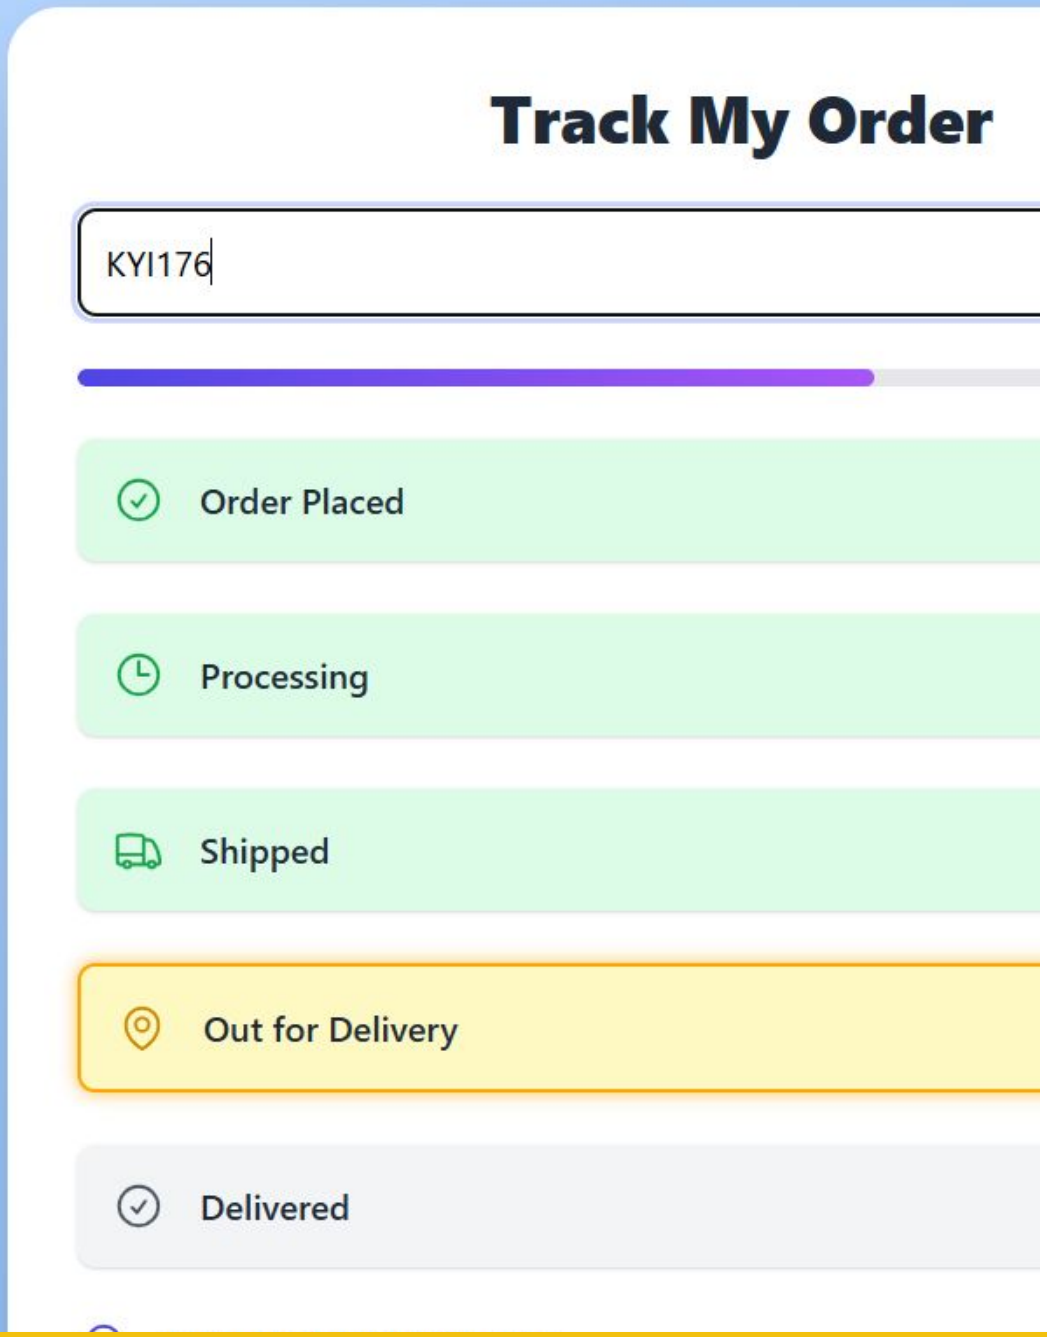

Marketplace Transaction Fees (Optional)

- Small fee per transaction on the shared SalesmanPro marketplace
- Aligns incentives: the platform grows as sellers grow

Add-On Services / Integrations

- Logistics & delivery solutions
- Payment processing
- Marketing tools
- Premium support & training

Traction & Milestones

Pre-Launch Validation & Momentum (Kenya Focus):

- **Seller Waitlist:** 1,000+ SMEs across Nairobi, Mombasa, and Kisumu pre-registered on our platform, indicating strong market demand.
- **Pilot Commitments**.
- **Partnership Acceleration**.
- **MVP Launch in Nairobi & Mombasa:** Onboard 500+ active sellers within first month.
- **Mobile App Rollout:** Release iOS & Android apps to support 30% of transactions via mobile.
- **Expansion to Kisumu & Nakuru:** Scale to 2 additional urban centers, targeting 2,500 total sellers.

Go-to-Market Strategy

Acquisition & Retention:

Community Ambassador Program: Recruit 20 local seller champions in Nairobi, Mombasa, Kisumu; reward with fee waivers and co-marketing support.

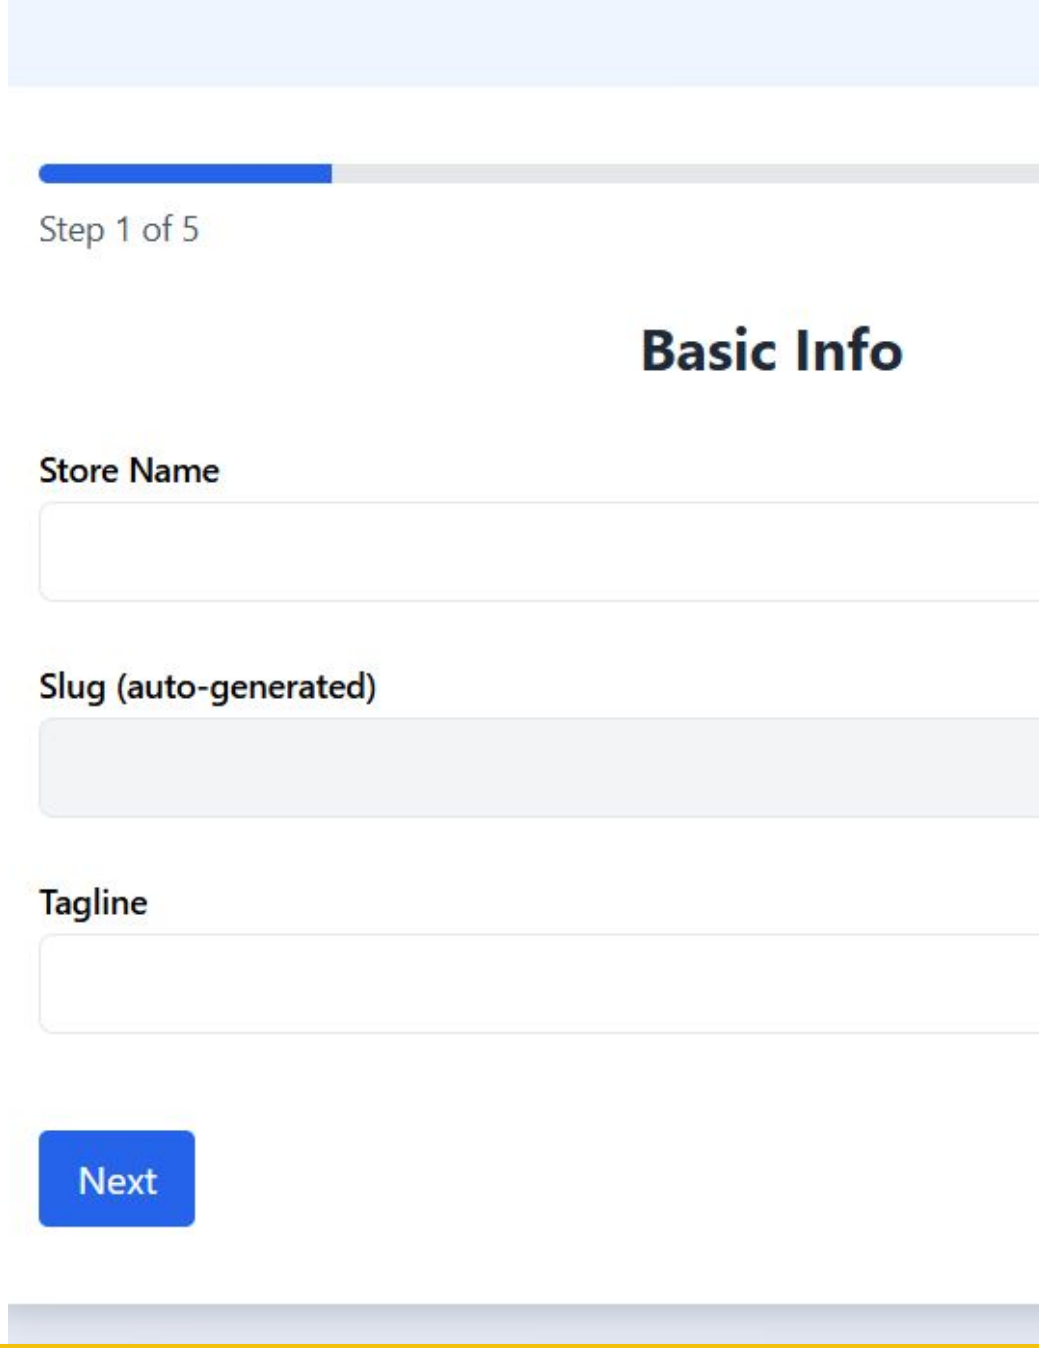

WhatsApp & Telegram Groups: Facilitate hyper-local buying/selling circles; seed 10 active groups with daily deals and platform tutorials.

Partnership Workshops: Host free monthly training sessions for SMEs at coworking spaces (Nairobi Garage, iHub), driving 200+ sign-ups per event.
